Federal Communications Communication Office of the Secretary

Dear Ms. Dortch:

Re:

WC Docket No. 10-90, 11-42 and 14-58 -

FCC Form 481 due July 1, 2014 -

Whidbey Telephone Company (Study Area 522452)

Enclosed herewith for filing with the Federal Communications Commission ("Commission") is an unredacted copy of the FCC Form 481 (including the attachments thereto), due July 1, 2014, of Whidbey Telephone Company ("Company"), as filed electronically with the United States Administrative Company pursuant to Sections 54.313 and 54.422 of the Commission's rules, 47 C.F.R. §§ 54.313 and 54.422, and two redacted copies of that same document. These documents are being submitted in accordance with, and pursuant to and under the Protective Order issued by the Chief, Wireline Competition Bureau, released November 16, 2012, (DA 12-1857) in WC Docket No. 10-90, et al. ("Protective Order"), with the former being a Stamped Confidential Document, as that term is defined in Paragraph 2 of the Protective Order, and with each of the latter being a Redacted Confidential Document, as that term is defined in Paragraph 2 of the Protective Order. Each of these documents has been stamped (marked) in accordance with the instructions set forth in Paragraph 4 of the Protective Order.

In accordance with Paragraph 4 of the Protective Order, two copies of the abovementioned Stamped Confidential Document and this cover letter are being delivered to Charles Tyler, Telecommunications Access Policy Division, Wireline Competition Bureau, Federal Communications Commission, 445 12th Street, S.W., Room 5-A452, Washington, D.C. 20554.

The information in this filing for which protected status under the Protective Order is being sought is limited to "Confidential Financial Information," as that term is defined in the Protective Order. The Company represents that to the best of the Company's knowledge, that information is not otherwise available from publicly available sources, that the Company has kept that information strictly confidential, and that the information is subject to protection under FOIA and the Commission's

No. of Copies rec'd OH

implementing rules, and the Company claims that information constitutes some of its most sensitive business data which, if released to competitors or those with whom the Company does business, would allow those persons to gain a significant advantage in the marketplace or in negotiations.

Please let us know if the Commission has any questions regarding the accompanying FCC Form 481 documents.

Very truly yours,

Bruce Russell

Chief Operating Officer

RE: Rule Section 0.459 Request for Confidential Treatment Whidbey Telephone Company (SAC 522452) FCC Form 481 - Carrier Annual Reporting Data Collection Form

Dear Ms. Dortch:

Whidbey Telephone Company ("the Company") hereby requests, pursuant to Section 0.459 of the Commission's Rules, that the redacted portions of the Company's "5-Year Service Quality Improvement Plan" be withheld from public inspection.

In accordance with Section 0.459(b) of the Commission's Rules, the Company states:

- The specific information for which confidentiality is sought is comprised of the charts detailing annual projected network improvements and upgrades for voice and broadband services during the period from 2014 through 2019, and projecting capital expenditures and operating expenses for voice and broadband services during the same five-year period.
- 2. This information is submitted in compliance with the requirement in Section 54.313(a)(1) of the Commission's Rules that recipients of high-cost support submit a progress report on their five-year service quality improvement plans.

Marlene H. Dortch, Secretary July 1, 2014 Page 2 of 3

- 3. This information regarding the nature and timing of the Company's construction and network improvement plans, and the estimated costs thereof, is proprietary and confidential commercial and financial information that is routinely withheld from public inspection.
- 4. The voice and broadband services for which the 5-year service improvement plans have been prepared are subject to actual competition from a multiple system cable television operator as well as potential competition from competitive local exchange carriers, electric power utilities, fixed and mobile wireless service providers, and/or satellite carriers. The nature and scheduling of the Company's network upgrades and the size and timing of its related expenditures constitute very valuable competitive intelligence for any entity that is presently competing or that may be contemplating or planning entry into the Company's service area.
- 5. The nature and scheduling of the Company's network upgrades and the size and timing of its related expenditures constitute very valuable competitive intelligence that can greatly assist the planning of any entity that is already competing or that may be contemplating entry into the Company's service area.
- 6. The Company limits internal access to its 5-year service improvement plan to its key employees and consultants who need the information for planning, reporting and management purposes. The plan is not posted on any Company website, or included in any Company press release, report or other document that is available to the general public or to unrestricted portions thereof.
- 7. The Company does not make its 5-year service improvement plans available to the public, and has not previously disclosed the present plan or similar previous plans to third parties.
- 8. The Company requests that the redacted information in the individual annual charts included in the plan not be available for public disclosure until at least the end of the next full calendar year following the calendar year to which the chart applies. Competitors and potential competitors should not be able to see the Company's network deployment and expenditure plans for a particular year prior to the year, during the year, or during the year following the year (particularly because weather and other factors can cause construction delays). After that period, projects are generally completed, and competitors are able to observe directly or read published reports of what the Company actually did to improve its network and services.

Marlene H. Dortch, Secretary July 1, 2014 Page 3 of 3

The Company notes that it is also redacting and claiming confidential treatment, pursuant to the Bureau's *Protective Order*, DA 12-1857, released November 16, 2012, for the financial information submitted in compliance with the requirements of Section 54.313(f)(2) of the Commission's Rules.

Respectfully submitted,

Whidbey Telephone Company

Gerard I Duffy

Certification of Officer as to the Accuracy of the Data Reported for the Annual Reporting for CAF or LI Recipients

t certify that I am an officer of the reporting carrier; my responsibilities include ensuring the accuracy of the annual reporting requirements for universal service support recipients; and, to the best of my knowledge, the information reported on this form and in any attachments is accurate.

Name of Reporting Carrier: WHIDBEY TEL CO.

Signature of Authorized Officer: CERTIFIED ONLINE

Date 07/01/2014

Printed name of Authorized Officer: Bruce Russell

Title or position of Authorized Officer: COO

Telephone number of Authorized Officer: 3603210086 ext.

Study Area Code of Reporting Carrier: 522

Filing Due Date for this form: 07/01/2014

Persons willfully making false statements on this form can be punished by fine or forfeiture under the Communications Act of 1934, 47 U.S.C. §§ 502, 503(b), or fine or imprisonment under Title 18 of the United States Code, 18 U.S.C. § 1001.

WHIDBEY TELEPHONE COMPANY – 5-YEAR SERVICE QUALITY IMPROVEMENT PLAN PURSUANT TO 47 C.F.R. 54.202(a)

Whidbey Telephone Company("WTC") ("Company") hereby submits initial five-year build-out Service Quality Improvement Plan pursuant to 47 C.F.R 54.202(a)(1)(ii) that specifies proposed improvements or upgrades to the WTC network throughout its service area. In addition, WTC is providing information that includes an estimate of the population that will be serviced as a result of these improvements.

The receipt of universal service support, combined with other funding sources will allow WTC to continue to provide reliable, state-of-the-art, high-quality voice and broadband service to a population base of 17,252 with an estimated 8,678 homes in the rural communities of South Whidbey Island and Point Roberts, WA. The projects listed within this plan will be used to improve or upgrade the network over the next five years, and in addition to the substantial expenditures and investments made over the past several years, will enable WTC to continue its long history of providing high quality and state-of-the-art telecommunications services.

The expected benefit to customers from the anticipated investment and expenditures is that customers will continue to receive a high level of telecommunication services and the new facilities will result in and/or enhance a platform that will provide additional capacity for the provision of existing supported services to customers in the Company's designated ETC service area and on which additional telecommunications services, including, but not limited to, advanced telecommunications services can be provided to customers in the Company's designated ETC service area. These projects will improve the quality of service and network capacity available to the Company's customers in the portions of the Company's designated ETC service area in which new facilities are to be deployed, as well as increase the number of services available in most, if not all, of the Company's designated ETC service area. The Company further expects that any federal high-cost fund support received by the Company will aid the Company's efforts to continue to provide the supported services at rates that are reasonably comparable to the rates for such services in urban areas. All customers in the Company's designated ETC service area will benefit from the expected level of universal service support by continuing to have available to them services that are reasonably comparable to the telecommunications services offered in urban areas at rates that, if adequately supported by other factors, such as state universal service fund, are reasonably comparable to the rates for such services in urban areas.

Over the next 5 years, WTC will enhance its network to include fast broadband speeds, shortening its existing local loops to enable faster broadband speeds and expanding its core network to handle increased bandwidth services. In addition, WTC will continue to expand its existing fiber optic network to support additional bandwidth requirements. Finally, WTC will continue to support and maintain all existing network infrastructure to insure the highest level of uninterrupted services and to complete all service requests within a reasonable amount of time.

Whidbey Telephone Company has scheduled the following improvement and/or upgrades to its network(s). These improvements and/or upgrades are either currently in progress and/or are scheduled to take place over the five year time period covering the calendar years of 2014 through 2019:

Whidbey Telephone Company
FCC Form 481 (July, 2014), Line 510
Description of Processes and Procedures to Ensure
Compliance with Service Quality Standards and
Consumer Protection Rules Per Instructions
For Completing FCC Form 481 – Voice Services

This document details the processes and procedures that Whidbey Telephone Company (the "Company") follows to ensure compliance with service quality standards and consumer protections rules as set forth in the Instructions for Completing FCC Form 481.

For service quality standards that are affected by plant issues, the Company engineers and installs its plant and other facilities in such a way as to ensure, to the greatest extent possible, compliance with service quality standards that exist at the time that the plant and facilities are constructed. Plant is augmented, upgraded and/or reconfigured as needed.

In addition, Company employees are periodically briefed on issues involving service quality standards and consumer protection rules such as CPNI rules and regulations and the Red Flags Rule. In particular, if any set of issues appear to be prevalent, employees are given briefings on how to handle such issues. An example of such an issue is the call completion problems that have arisen and the customer calls that are generated as a result. Although this is not a service quality problem caused by the Company, it does affect customers of the Company and, therefor, deserves the attention of the Company employees.

The Company also periodically reviews its operating procedures to be sure that those operating procedures are in compliance with service quality standards and are not in violation of consumer protection rules. If questions arise, legal counsel is sought as needed.

If a complaint pertaining to the Company's compliance with service quality standards or consumer protection rules is received by the Company, the complaint is promptly investigated, the matter tracked and any corrective action noted. This process ensures that issues involved in the matter are addressed and corrections made, if needed.

Whidbey Telephone Company FCC Form 481 (July, 2014), Line 610 Statement Describing Ability to Function in Emergency Situations Per Instructions for Completing FCC Form 481 - Voice Services

SUMMARY

Whidbey Telephone Company (the "Company") has a long-standing tradition of providing reliable voice telephony services. Since 1961, it has been and continues to be the Company's policy to bury all local distribution cable and wire. It is also the Company's policy and standard operating procedure to install, and use when necessary, back-up power systems at all network node installation sites. In regard to the Company's overall network design, the Company's practices are consistent with Rural Utility Service ("RUS") telecommunications industry best practices.

The Company operates and maintains transport transmission equipment of only the highest grade. Equipment specifications, which are consistent with the RUS specifications, require both redundant power and redundant circuit interfaces. All of the Company's transport and switching equipment is monitored 7x24x365(366) by trained staff located at the Company's network operations center.

NETWORK REDUNDANCY

The Company is a provider of voice telephony services to two geographically non-contiguous exchanges: the South Whidbey Exchange and the Point Roberts Exchange. The area of the Company's South Whidbey Exchange service area is more than 67 square miles, and the Company's Point Roberts Exchange service area includes approximately 6 square miles.

The Company operates two central office switches (each a "CO"): an access tandem and host switch at South Whidbey and a remote switch at Point Roberts. These switches are manufactured and supported by their manufacturer. The Point Roberts CO is connected to the Company's South Whidbey CO via multiple diversely routed redundant facilities and is configured to maintain service in the event of a facility failure to the South Whidbey CO. The primary paths consist of a diversely routed optical fiber ring utilizing Synchronous Optical Network ("SONET") technology. In addition the Company operates two diversely routed microwave transmission paths between South Whidbey and Point Roberts each of which provides multiple DS-3s capacity and which offer additional back-up capability.

The Company's voice telephony network has diversely routed paths to multiple points of interconnection with the networks of other voice telephony carriers. The Company also operates a Multiprotocol Label Switching ("MPLS") optical ring that connects its South Whidbey network with collocation facilities utilized by the Company outside its service area. The combination of the optical ring architecture and the DWDM capability of the Company's core transport equipment provides a highly reliable circuit network for voice telephony communications with substantial opportunity for augmentation, if demand volumes were to so require.

The Company's presence in collocation facilities allows for multiple points of interconnection with both local and regional carriers, giving the Company the flexibility to route traffic to multiple carriers. During service impairment created by physical damage or extraordinarily high traffic, the Company has the capability to reroute voice telephony traffic through any of those collocation facilities.

The network architecture within the Company's South Whidbey service area is comprised of a host CO and a number of core aggregation points, or Optical Remote Sites ("ORSs"). All of the ORS locations are connected by a physically diverse optical DWDM ring, with any of those locations being capable of maintaining service in the event of a failure of that physical fiber cable.

Connectivity to the end-user customer base is accomplished by the placement of a number of Broadband Loop Carrier remote terminals ("BLCs") that subtend the ORSs or host CO. Each of these BLCs has optical diversity between the main CO and serving ORS. Some of the BLCs also have physical route diversity connected to the CO or ORS that they subtend.

The Company's employees are trained to operate, maintain and/or repair the Company's network facilities. Qualified Company personnel are available for call-out 24x7x365(366) in the event of a service outage. The Company maintains an inventory of critical spare electronic/optronic cards, as well as cabinets, cable and other related materials necessary for restoration on site at both South Whidbey and Point Roberts.

BACK-UP POWER

The Company maintains a power plant at each CO, ORS, BLC and microwave site with batteries capable of carrying the power load for several hours with the load typically transitioning more immediately to a generator back-up power generation.

In addition, the Company has installed back-up power generation at its COs, as well as at each of its ORSs, BLCs, and microwave installations. These generators range in size from 750kw to 5kw. Each generator has a dedicated fuel tank onsite designed to carry the power load for multiple days. All of these sites are equipped with automatic transfer switches and have monitoring equipment that provides monitoring visibility with respect to loss of external commercial power and transfer switch status. Upon recognition of loss of the commercial power source, the relevant automatic transfer switch is designed to automatically start the back-up generator and transfer the selected power source. Alarm messages are automatically reported to key personnel, as well as to the Company's 7x24x365(366) network operations center.

The Company has in-house staff trained to perform all maintenance of the power plant and has contract services available for support. Power distribution equipment within the Company's COs is inspected from time to time by vendor representatives to ensure proper maintenance. It is the Company's policy that all power plant maintenance be recorded and stored for future reference.
